

Sergei Filatyev

- Math (for Russian Speaking)
- Math (in English)

Sergei has a Ph.D. in Aerospace Engineering from University of Michigan. He also holds master degrees in Physics from Moscow Institute of Physics and Technology and in Economics from Higher School of Economics. In his career, Sergei worked on problems related to aerospace, mechanical, chemical, petroleum engineering, economics, finance, and data science among others.

At the Russian School, Sergei teaches mathematics to different age groups. His main goal is to make sure students don't memorize solutions to math problems but have a good understanding of them. Because of his work experience he also brings real world problems to the classroom. It is always fun to know that many problems that seem to be complicated at a first glance, can actually be solved at the school math level.
